

What happens to a lead, minute by minute

One chart showing the whole of System 1 — from the moment a man leaves his number, through the message, the phone calls, the night, the next morning, and on to the sale. The time of day decides who acts next, and that is built into every step.

FIRST The three time windows

THE TIME	WHAT WE CALL IT	WHAT ACTUALLY HAPPENS
9:30 AM – 7:00 PM	Office hours Agents at their desks	WhatsApp goes first. If he does not answer it, he is rung within ten minutes — by one of your agents if he has no WhatsApp, or by the AI voice call if he simply has not replied.
7:00 PM – 9:00 PM	Evening Office shut, ringing still fine	WhatsApp goes first. If he does not answer it, the AI voice call tries once and then stops. Any human call waits for the morning.
9:00 PM – 9:30 AM	Night Nobody rings anybody	WhatsApp still goes out immediately, and if he replies the AI talks to him there and then . No telephone call is made until 9:30 the next morning.

SECOND What the colours mean

- BLUE — information**
Something arriving, or a fact we now know
- SAND — a person**
One of your agents does this
- GREEN — good news**
Money, or a step closer to it
- TEAL — the machine**
Happens on its own, nobody must remember it
- ORANGE DIAMOND — a question**
The answer decides where he goes next
- RED — stop**
He is not a buyer

Every arrow carries words. Each one says why the man moves that way — read them and the chart tells the story on its own.

The next page is one large sheet. The full chart is printed at a size where every word stays readable. On screen, zoom in and scroll down through it.
